

Safety Data Sheet – Wasp Bait

1. IDENTIFICATION

Product Name: Hawkeye Wasp Bait
Other Names:
Recommended Use: Insecticide
Manufacturer: Renovo Technologies Ltd
Address: PO Box 3218, Fitzroy, New Plymouth 4312
Telephone: 0800 002920
Emergency Phone: 0800 CHEMCALL (0800 243 622)
National Poisons Centre: 0800 764 766

2. HAZARDS IDENTIFICATION

Signal Word: WARNING

Hazards:

Skin sensitization category 1
Hazardous to terrestrial invertebrates

Hazard Phrases

May cause an allergic skin reaction.

Precautionary Phrases:

Read label before use.
Avoid breathing vapours
Contaminated work clothing should not be allowed out of the workplace.
Wear protective gloves.
IF ON SKIN: Wash with plenty of soap and water.
If skin irritation or rash occurs: Get medical advice/attention.
Take off contaminated clothing and wash before re-use.
Dispose of contents/container in accordance with local/regional/national regulations
Take all reasonable steps to ensure that the substance does not cause any significant adverse effects to the environment beyond the application area
Do not apply substance to plants if bees are foraging; or the plants are in flower or part flower, and are likely to be visited by non-target invertebrate pollinators (including bees)

Pictograms:

3. COMPOSITION: Information on Ingredients

Ingredient	CAS Number	Concentration (%w/w)
s-Indoxacarb	173584-44-6	<0.1
Balance – Proprietary ingredients of low hazard	Proprietary	To 100%

4. FIRST AID MEASURES

Consult the National Poisons Information Centre 0800 POISON (0800 764 766) or a doctor in every case of suspected chemical poisoning. Never give fluids or induce vomiting if a patient is unconscious or convulsing regardless of cause of injury. If breathing difficulties occur seek medical attention immediately.

Swallowed

Ingestion of small quantities is unlikely to result in chronic effects. If swallowed, do not induce vomiting. Obtain medical attention if symptoms occur.

Safety Data Sheet – Wasp Bait

Skin Contact

Remove contaminated clothing and shoes and wash skin with plenty of soap and water. Wash clothing before reuse. Seek medical attention if symptoms occur.

Eye Contact

Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Remove contact lenses if present and easy to do and continue rinsing. Obtain medical attention if symptoms persist.

Inhalation

Move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped.

First Aid facilities

Provide eye baths and safety showers close to areas where exposure may occur.

Medical Attention

Treat symptomatically and supportively, monitoring the development of hypersensitivity reactions with respiratory distress. No known antidote. In all cases consult the National Poisons Centre for the most up to date treatment information.

5. FIRE FIGHTING MEASURES

Shut off product that may 'fuel' a fire if safe to do so. Allow trained personnel to attend a fire in progress, providing fire fighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

Suitable extinguishing media

Fine Spray, water fog, alcohol resistant foam, dry chemical powder or carbon dioxide. Do not use water stream directly. Cool fire exposed container with water spray.

Hazards from combustion products

Burning chemicals may produce by-products more toxic than the original material. Decomposition from combustion may emit acrid smoke and toxic fumes containing carbon oxides, nitrogen oxides, hydrogen fluoride and hydrogen chloride, and sulphur oxides.

Precautions for fire fighters and special protective equipment

Full protective clothing with chemical goggles, butyl or neoprene gloves and self-contained breathing apparatus

Hazchem Code

2Z

Flash Point

>95°C

6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures

Prevent product from escaping to drains and waterways. Contain leaking packaging in a containment vessel or bunded area. Prevent any vapours or dust from building up in confined areas. Ensure that drain valves are closed at all times. Clean up minor spills immediately.

Methods and materials for containment for a major spill

While a major spill is unlikely due to the small pack size of this product if a major spill were to occur: Warn occupants of downwind areas of possible hazards. Keep the public away from the area. Prevent product from entering sewers, watercourses, or low-lying areas. Shut off the source of the spill if safe to do so. Advise relevant authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation. Take measures to minimise the effect on the groundwater. If possible recover product by collecting with a shovel, scraper or other suitable piece of equipment. Collect and seal in properly labelled containers for disposal. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. In all instances due consideration must be given for First Aid Measures (Section 4), PPE requirements (Section 8), Stability and Reactivity (Section 10) for this material.

7. HANDLING AND STORAGE

Precautions for safe handling

Keep out of reach of children. Keep containers closed. Use only in well-ventilated areas. When handling do not eat, drink or smoke. Wash hands thoroughly after handling. Wash clothing separately before reuse.

Safety Data Sheet – Wasp Bait

Conditions for safe storage

Store in a cool, dry place away from direct sunlight. Keep away from heat and ignition sources. Store in original containers. Protect from physical damage to prevent accidental release. Do not store with food, feedstuffs, fertilizers and seeds.

Incompatible materials

None known.

Fire Extinguisher Requirements

No specific requirements.

8. EXPOSURE CONTROLS: Personal Protection

Exposure Limits

A WES has been set by MBIE for a material in this product, acetic acid. The WES for acetic acid is TWA 10ppm or 25 mg/m³. No EEL has been set for this product by the EPA.

Engineering Controls:

For bulk quantities of this material the use of local exhaust ventilation is recommended to control process emissions near the source. Sufficient ventilation should be provided to keep the solvent in air concentrations below any relevant exposure limit. Provide mechanical ventilation of confined spaces.

Hygiene Controls:

It is best practice for facilities storing or utilising this material should be equipped with an eyewash facility, safety shower and facility for washing hands/face after work.

Personal Protective Equipment

Respiratory Protection: Respiratory protection shouldn't be necessary under most circumstances, but if desired or large quantities are being applied use a respirator with carbon filter for vapours.

Eye protection: Safety glasses or chemical goggles are best practice when handling large quantities of this product. Contact lenses may absorb and concentrate irritants, glasses are recommended.

Skin/ Body Protection: It is best practice to wear long sleeves and long trousers or coveralls, and enclosed footwear when handling this product in large quantities. It is recommended that chemical resistant gloves (eg nitrile, neoprene) be worn when handling this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Golden semi-viscous liquid
Odour:	Characteristic odour
Odour Threshold:	No data available
Boiling Point (°C):	Approximately 100°C
Boiling Point Range	No data available
Melting Point (°C):	Not applicable
Flash Point (°C):	>95
Lower Explosive Limit, LEL (%):	No data available
Upper Explosive Limit, UEL (%):	No data available
SG/ Density, 20°C (g/mL):	1.2 – 1.3
Vapour Pressure, 20°C (kPa):	No data available
Vapour Density:	No data available
Alkalinity/ acidity as pH:	4.0 – 5.0
Solubility in water:	Forms a suspension
Partition Coefficient (Kow):	Log P 4.65 (Indoxacarb active ingredient)
Auto-ignition Temperature (°C):	No data available
Decomposition Temperature (°C):	No data available
Kinematic Viscosity:	No data available

The values listed are indicative of this product's physical and chemical properties. Data is not available for any properties not listed above.

Safety Data Sheet – Wasp Bait

10. STABILITY AND REACTIVITY

Chemical stability

Stable at room temperature and pressure.

Hazardous decomposition products

Decomposition from combustion may emit acrid smoke and toxic fumes containing carbon oxides, nitrogen oxides, hydrogen fluorides, hydrogen chlorides and sulphur oxides.

Specific Materials to Avoid

Strong acids, alkalis, oxidising agents, reducing agents and heat.

Hazardous Polymerisation

Not known to occur.

11. TOXICOLOGICAL INFORMATION

Acute Effects

Ingestion: Low toxicity if swallowed. Exposure to large quantities of active ingredient may result in such nonspecific symptoms as headache, dizziness, weakness, and nausea. Impaired mobility and tremors have been observed in laboratory studies on the active ingredient.

Ingestion of small amounts is unlikely to cause permanent injury. Contact the National Poisons Centre immediately if ingested.

Eye Contact: The liquid may cause transient eye irritation. Avoid eye contact

Skin Contact: The active ingredient has been observed to cause an allergic skin reaction in some instances. Avoid skin contact.

Inhalation: The vapour/mist from inhaling large quantities may be discomforting to the upper respiratory tract and lungs. Acute effects from inhalation of high vapour concentrations may cause effects similar to that of ingestion.

Chronic Effects

Prolonged or repeated exposure to large quantities of the active ingredient on the skin may result in an allergic response. Persons with pre-existing conditions are advised to limit or avoid product contact.

Other Health Effects Information

Not Available.

Toxicological Information

Oral LD₅₀: 268 mg/kg (rat), indoxacarb active ingredient; 19,000 mg/kg (product, estimated)

Dermal LD₅₀: >30,000 mg/kg (product, estimated)

Inhalation LC₅₀: >400 mg/L (product, estimated)

12. ECOLOGICAL INFORMATION

Ecotoxicity

This product is harmful to the environment. See hazard classifications in section 15 of this document. No specific ecological data available on this product.

Persistence/ Biodegradability: log P: 4.65. This substance (indoxacarb) is regarded as moderately persistent and low bioaccumulation potential.

Mobility: This product is not readily soluble with water limiting its mobility in the environment. This product is likely to have low mobility in the environment and low leaching potential

Aquatic Toxicity:

Fish toxicity LC₅₀: 474 mg/L; product, estimated

Daphnia Magna EC₅₀: 373 mg/L; product, estimated

Algae EC₅₀: 95 mg/L; product, estimated

Honey Bees: 84 µg/organism; product, estimated

Safety Data Sheet – Wasp Bait

13. DISPOSAL CONSIDERATIONS

Product Disposal

Dispose of product only by using according to label or using an approved waste disposal contractor. If this material as supplied becomes a waste care should be taken to ensure compliance with national and local authorities. It is the responsibility of the waste generator to determine the toxicity and physical properties of the waste generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Do not dispose of via municipal sewers, drains, natural streams or rivers

Packaging Disposal

Empty packaging should be taken for recycling, recovery or disposal through a suitably qualified or licensed contractor. Care should be taken to ensure compliance with national and local authorities. Packaging may still contain product residue that may be harmful. Incinerate via approved incinerators or crush and bury in an approved landfill. Ensure that empty packaging is managed in accordance with and HSNO regulations.

14. TRANSPORT INFORMATION

UN No: Not a DG for transport

15. REGULATORY INFORMATION

Country/ Region: New Zealand

ACVM Approval Number:

N/A

EPA Approval Number:

HSR101544

HSNO Controls:

Trigger Quantities for this Material:

- Certified Handler Test Certificate: Not Required
- Location Compliance Certificate: Not Required
- Hazardous Atmosphere Zone: Not Required
- Signage: 10,000 L
- Emergency Plan, Secondary Containment: 1000 L
- Tracking: Not required

The trigger quantities above must take into account any other hazardous substance that is present at that location. This represents a partial list of the controls for this material..

16. OTHER INFORMATION

Reasons for Issue:

New SDS

Abbreviations:

TWA - the highest allowable exposure concentration in an eight-hour day for a five-day working week

STEL - maximum allowable exposure concentration at any time

EPA: Environmental Protection Agency of New Zealand

HSNO: Hazardous Substances and New Organisms
